

侧式悬臂堆料机/侧式刮板取料机

Side Cantilever Stacker & Side Scraper Reclaimer

产品用途及特点：

该类堆取料机多用于堆取砂岩、原煤等辅助散状物料。可实现跨料堆作业，实现了整机无人操作及机、电、液一体化。具有均化效果好、料场储量大、占地面积小、自动化程度高等特点，是目前国内最先进的大型混匀工艺设备，达到国际同类产品的先进水平。

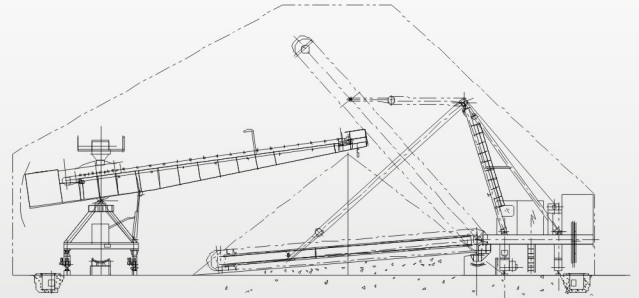

重大装备 高端成套

High Integrated Technology Key Equipment and Turn-Key Service

Applications & Features of Product:

This equipment which is usually used in stacking and reclaiming sandstone, coal and other assistant bulk material. It can work across piles, It is realized the unmanned operation and the mechanical-electrical-liquid integration. Now it is the most advanced large-scale homogenizing equipment in China which has the characteristic of large storage, small floor space, high degree automation. To reach the international advanced level of similar products.

设备选型参数表 Equipment model selection parameter list

设备类型	轨距 (m)	物料种类 Type of material	物料比重 (t/m ³) Gravity of material	物料粒度 (mm) Grain size of material	物料水分 (%) Water of material	堆料能力 (t/h) Stacking capacity	取料能力 (t/h) Preclaiming capacity	可选择形式 Optional type
侧式悬臂堆料机 Boom-type Stacker	3.2-7	砂岩, 原煤等 sandstone, coal etc	0.9-1.45	< 100	< 15%	100-3700		回转式/非回转式 Slew/non-slew
侧式刮板取料机 Side Scraper Reclaimer	4-5	砂岩, 原煤等 sandstone, coal etc	0.9-1.45	< 100	< 15%		100-800	抬头式/倾斜式/水平式 Rising type/inclinable type/horizontal type
